1. ***IPL Photofacial-*** (intense pulsed light) is a procedure that uses broadband light to target & treat various skin conditions.

- Reduces sun damage, age spots, & freckles
- Improves skin tone & texture
- Treats rosacea & broken capillaries
- Stimulates collagen production

2. ***DiamondGlow***- This facial treatment uses a diamond-tipped wand to remove dead skin cells, while a vacuum extracts impurities & delivers a targeted serum deep into the skin for immediate & long-term results.

3. ***Hydrafacial***- is a non-invasive facial treatment that uses a special device to cleanse , exfoliate, extract impurities, & hydrate the skin for a radiant & clear complexion.
